Subject: Citing SEO funding and NIH compliance

Dear Faculty Research Mentors,

Many of the funded students in your lab will present a poster at a conference or be an author on a publication. We appreciate it when you remind the students to **reference the grant number or name** of their scholarship program(s) on any poster or publication.

NIH Compliance

For NIH-funded research, publications need to be in compliance with the **NIH Public Access Policy**: https://seo.sfsu.edu/content/publications and https://publicaccess.nih.gov/ .

Many science literature publishers automatically comply with the policy: "Final, peer-reviewed manuscripts must be submitted to the NIH Manuscript Submission System (NIHMS) upon acceptance for publication, and be made publicly available on PMC no later than 12 months after the official date of publication." NIH funded papers need to have a **PMCID**.

However, some publishers do not automatically comply with the NIH policy by making the paper available on the PMC website: http://www.ncbi.nlm.nih.gov/pmc/about/submission-methods/ and http://www.ncbi.nlm.nih.gov/books/NBK3846/ . In this case, the first author or the lead faculty mentor needs to complete the steps to comply with the NIH Public Access Policy.

If we do not comply with this policy, the SFSU NIH funding can be held up until we are in compliance. If you need help with this process, let us know.

Thank you,
SEO Leadership Team
